Too many people appreciate flowers because they are gifts and not because of their exquisite perfume.

Good sense is the oil that lubricates a progressive community. No community of business enterprise can run without it.

The egg crop of the United States for the fiscal year is said to have been 13,000,000,000. This refers, of course, only to those that were marketed. The American hen is full of business.

If you had nothing for which to be thankful Thursday, then everybody else ought to be thankful that few such ungrateful wretches encumber this broad land of peace and plenty.

Every rain demonstrates the need of sidewalks in the city. In a place and with the soil we have the question is very easy of solution. The sidewalk only needs good drainage and leveling to make all the walk that is necessary, especially in the resident district. There are examples in different parts of the city should convince the most exacting. An inspection of a well made and well drained walk without boards, cinders or other material than the dirt will show any one that a good walk can be made without other material. Such walks are dry and good immediately after a rain, and passable during a heavy down pour.

## Self Government.

Ardmore, Dec. 3.—Ex-United States Commissioner E. G. Tollett, Jr., one of the delegates to Washington from South McAlester convention of last February, and author of the "Jefferson Territory" bill introduced by Representative Moon of Tennessee, at the last session of congress, in discussing the statehood question said today:

"The question of self government for the Indian territory is a very important one, affecting as it does the political, social and commercial interests of some 400,000 American citizens, and commercially the entire southwest. In union and harmony there is strength, in division and town bickering there is confusion.

"The South McAlester convention last February, with 400 delegates from all sections, the beginning of concerted action on the part of the people, and a betterment of unhappy conditions in this territory. That convention aroused more interest abroad in matter vital to the Indian territory than all efforts heretofore exerted.

"Self government for the Indian territory has, in reality, been much needed for a number of years, but we have no right to complain, for not having already for the very good reason that no general effort has been made by us to get it."
